

MORE ROAD TIME

Submit, Track, and Complete Every Repair in One Place

AP Fleet now uses ServiceUp to manage all vehicle repairs. You have one place to submit requests, track progress, and get vehicles back on the road quickly. Faster repairs, full visibility, and nothing falling through the cracks.

Key Benefits

Visibility

See real-time status on every vehicle: what's being done, where, and when it'll be ready. Status updates and completion timelines live in one place instead of scattered across emails and phone calls.

Speed

Repairs move from request to completion with fewer handoffs and delays. Less downtime means fewer coverage gaps and more road time.

Simplicity

Submit a repair in minutes. Pick a nearby shop select from your preferred network. Everything from intake to completion runs through one system with no extra tools to learn.

Choice

Browse nearby shops, check availability, pricing and reviews. Select a shop based on your needs. Wherever the vehicle is, there's a ServiceUp marketplace shop nearby.

What ServiceUp Does

Centralized Workflow

- Submit and track repair orders from one dashboard
- Estimates reviewed and approved automatically so repairs start faster
- Mid-major mechanical and preventative maintenance

Shop Network & Marketplace

- Access a nationwide repair network
- Add and manage your preferred shops
- Route by location, availability, price, and reviews

Status and Updates

- Real-time repair status on every vehicle
- Notifications at each stage: approved, in progress, complete
- Full repair history by vehicle
